D. M. Sugimura, Director

**CITY OF SEATTLE
ANALYSIS AND DECISION OF THE DIRECTOR OF
THE DEPARTMENT OF PLANNING AND DEVELOPMENT**

Application Number: 2307091
Applicant Name : Olivia Voigts, for Clear Channel Outdoor
Address of Proposal: 55 South Atlantic Street

SUMMARY OF PROPOSED ACTION

Master Use Permit to establish use for the future construction of a single-faced, externally illuminated billboard advertising sign with a 14 foot by 48 foot display face. The sign will have an overall height of sixty-five (65) feet above grade. The sign face will be oriented to the south.

The following approval is required:

SEPA - Environmental Determination - Chapter 25.05, Seattle Municipal Code.

SEPA DETERMINATION: ☐ Exempt ☒ DNS ☐ MDNS ☐ EIS

☐ DNS with conditions

☐ DNS involving non-exempt grading, or demolition, or
another agency with jurisdiction.

BACKGROUND DATA

Site and Vicinity Description

The proposal site is located on the east side of Colorado Avenue South mid-way between South Atlantic and South Massachusetts Streets in the industrial area to the southwest of the Safeco Field baseball stadium. The subject property and block are zoned General Industrial 1 with an eighty-five (85) foot height limit (IG 1 U/85). The area is within an identified environmentally critical area; liquefaction prone, thus development is subject to the provisions of Chapter 25.09 of the Seattle Municipal Code.

The site and vicinity are in a highly industrialized, automobile, and truck oriented area. The Highway 99 viaduct is to the west across Colorado Avenue South. The subject lot contains a large multi-story warehouse building (The Bemis Building) on the north portion. The southern portion where the proposed billboard will be located contains sixty-two (62) parking spaces for both on-site and off-site users.

Area Development

The lot and surrounding area is zoned for industrial uses and developed consistent with the zoning designation and allowed uses. Surrounding the site are a variety of industrial and commercial buildings providing a variety of warehouse and storage services, surface parking lots, and toward 1st Avenue South, commercial uses oriented toward patrons of the two sports stadiums.

Proposal Description

The applicant proposes to build and maintain one billboard advertising sign with one 14 foot by 48 foot display surface at the southwest corner of the site. The display surface will be externally lit and face south. Overall height of the structure will be sixty-five (65) feet above grade.

Public Comments

During the public comment period which ended December 17, 2004, the City received no written comments.

ANALYSIS - SEPA

The initial disclosure of the potential impacts from this project was made in the environmental checklist submitted by the applicant dated October 31, 2003. The information in the checklist, project plans, and the experience of the lead agency with review of similar projects form the basis for this analysis and decision.

The SEPA Overview Policy (SMC 25.05.665 D) clarifies the relationship between codes, policies, and environmental review. Specific policies for each element of the environment, certain neighborhood plans and other policies explicitly referenced may serve as the basis for exercising substantive SEPA authority.

The Overview Policy states in part: "where City regulations have been adopted to address an environmental impact, it shall be presumed that such regulations are adequate to achieve sufficient mitigation" (subject to some limitations). Under certain limitations or circumstances (SMC 25.05.665 D 1-7), mitigation can be considered. Thus, a more detailed discussion of some of the impacts is appropriate.

Short - Term Impacts

The following temporary or construction-related impacts are expected: decreased air quality due to suspended particulates from building activities and hydrocarbon emissions from construction vehicles and equipment; increased traffic and demand for parking from construction equipment and personnel; increased noise; and consumption of renewable and non-renewable resources. Due to the short term and minor nature of construction impact associated with the construction of the sign, no mitigation is warranted by SEPA policies.

Long - Term Impacts

Long-term or use-related impacts include minor ongoing use of electricity to light the sign face, illumination of the sign face and increased traffic, noise, and vehicular emissions from the monthly copy posting and routine maintenance visits. Since the site is one block from a principal arterial and a State Highway, both with significant traffic volumes in an area of industrial zoning and uses, and the surrounding uses generate light and noise, these impacts are anticipated to be minor. Therefore no mitigation is warranted pursuant to SEPA policies.

The Sign Code (SMC 23.55) regulates the location, size, and other characteristics of off-premise signs and provides sufficient mitigation for the following impacts:

Cumulative Impacts

The revised Seattle Sign Ordinance has reduced the number of billboard advertising signs permitted in a given area of the City by modification of the sign dispersion standards. Sign dispersion standards limit the number of signs by requiring a minimum separation between signs and permitting a maximum number of signs in a one-half mile distance. According to SMC 23.55.014.E, the number of advertising or off-premise sign faces is limited to two signs within 300 lineal feet with a minimum separation of 100 feet between sign structures. The dispersion requirements and zoning standards were reviewed by the DPD sign inspector and the proposed sign has been found to show compliance with the applicable requirements, therefore, no further mitigation pursuant to SEPA is warranted.

Light and Glare

The Sign Code requires that light sources be shielded so that direct light is not visible on adjacent properties (SMC 23.55.016) and also limits fluorescent lighting of off-premise advertising signs to one

watt per square foot of sign area (SMC 23.55.014.E). Surrounding land uses are industrial and commercial in nature and generate their own traffic, noise and light. There are no nearby residences which would be adversely impacted by the proposed illumination. Light and glare impacts are sufficiently mitigated by the Sign Code lighting standards and the applicant's proposal to limit the hours of illumination. Thus, no additional light and glare mitigation measures are necessary.

DECISION - SEPA

This decision was made after review by the responsible official on behalf of the lead agency of a completed environmental checklist and other information on file with the responsible department. This constitutes the Threshold Determination and form. The intent of this declaration is to satisfy the requirements of the State Environmental Policy Act (RCW 43.21C), including the requirement to inform the public agency decisions pursuant to SEPA.

- [X] Determination of Non-Significance. This proposal has been determined to not have a significant adverse impact upon the environment. An EIS is not required under RCW 43.21C.030 2c.
- [] Determination of Significance. This proposal has or may have a significant adverse impact upon the environment. An EIS is required under RCW 43.21C.030 2c.

CONDITIONS - SEPA

None.
